Cervical Collar

Indications
• To reduce neck mobility
• Acute or chronic painful cervical syndrome

Contra Indications
• Severe neck injuries such as cervical vertebral fractures

Precautions
• If unusual swelling, skin discoloration or discomfort occurs, use should be discontinued and a healthcare professional consulted.
• Be careful that the cervical collar is not so tight that it interferes with breathing.
• Ensure appropriate wound care procedures are undertaken prior to application over open wounds or infected areas.

Application
BraceID Cervical collar is pre-shaped to suit the anatomical conditions.
1. Place the collar at the front of the neck with the cut out under the chin.
2. Wrap the ends around the neck and secure the hook-and-loop fasteners
3. The extra stockinet should be applied over the collar for additional hygiene

Care & Cleaning
Machine-wash at 30°C or hand-wash in lukewarm water. Fasten closure before machine-wash. Rinse thoroughly and dry at room temperature. Be sure the collar is completely dry before re-applying it.
