

Ropox Ergo2 Tables

Strong, stable and excellent value for money.

They may be adjusted to suit specific activities and individual requirements.

The Ropox Ergo2 tables give great wheelchair access with simple height adjustment by a removable winding handle.

- Height adjustment from 56-90 cms
- Can take loads up to 100 kgms
- The dark grey framework is complemented by the lighter grey laminate tabletop which has ABS edges and rounded corners for extra durability and a modern style
- Brake castors can be added for mobility
- There are 2 versions - with a fixed top or a tilting top with stepped angles up to 54 degrees and these are available in 2 sizes: 90x60cm and 120x60cm
- Arm supports can be added very easily to the front edge of the tables by clipping onto a rail which comes as standard with the tilting table, but is an accessory for the fixed top
