Elexo mobile shower-toilet chair

5100 5500

Elexo with removable leg supports

Caring for patients / residents with traditional shower-toilet seats is heavy work. Care staff are obliged to work in unnatural postures and suffer from static back strain. Lopital offers relief with the height-adjustable Elexo shower-toilet seat.

The Elexo provides comfort and security for both carers and patients/residents. Its flexible height reduces back strain suffered by carers to a minimum, which allows the Elexo to make an important contribution to the healthcare sector health and safety policy.

The electric height-adjustability ensures that the seat reaches a maximum tilting angle of 17 degrees when at its maximum height, thereby creating the optimum seating balance for the patient / resident.

- Simple electric high/low adjustment
- Manual operation with battery indicator
- With sleep mode setting after 60 minutes
- Maximum load 180 kg
- Lowest position 50 cm, highest position 105 cm
- Frame width 68 cm, dept 83 cm
