

SuperRamp by Handi Life Sport

The SuperRamp consists of:

- a foot made of stainless steel
- ramp base, molded from strong polycarbonate and already attached to the ramp
- 4 extra ramp parts, molded from polycarbonate (one of the parts is equipped with a ball holder)
- Length of the individual ramp parts: 110/42/48/56 cm. Total weight: 8 kg.
- Total weight: 8 kg

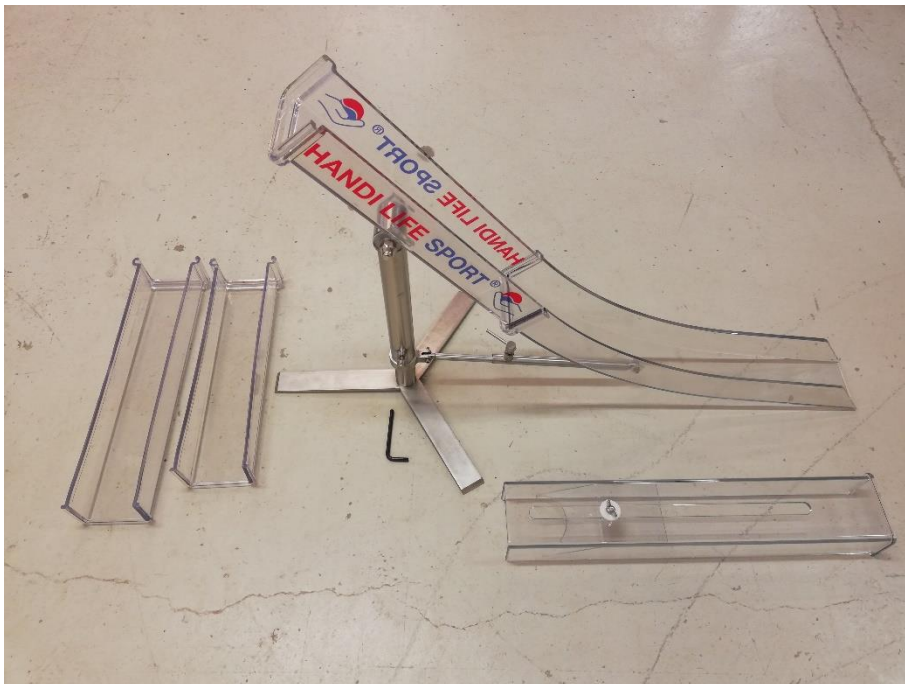

Super Ramp is fast and easy to put up and down, and to adjust. We wish you the best of luck with your new ramp and with you boccia experiences!

Assembly instructions:

1. Below you see the different parts of SuperRamp (however, we have already mounted the ball holder to the adequate ramp part):

2. Put the curved item on the base

3. Now you are ready to attach the required ramp parts – and play!
