LET'S GET MOVING

We are proud to present our **TRACK>**, rollator, a groundbreaking alternative for a – deserved – demanding group of customers. Compact, complete and looking good!

## Double foldable

The one characteristic that really makes the **TRACK>** different from its competition is its ability to fold twice! Not only is it ultra lightweight, but because you are able to fold it both vertically and horizontally and it weighs only 16.31 lbs, the **TRACK>** can be handled and carried with just one hand. This allows you to easily fold and hide the rollator under coatrack or chair when it is not being used.

## Complete

A second benefit of buying the **TRACK>** is that it is delivered standard with accessories included! There are no hidden costs since the **TRACK>** is already equipped with: a walking stick holder, an easy to carry and good looking bag, a net bag, a light, 8 reflectors, parking break, ergonomic handles, detachable back strap with nametag and small storage bag, a carry bag, a sturdy, serving tray and a lifting pedal.

## Looking good

And true to the WheelzAhead® brand, all materials used for the **TRACK>** are the latest ones out there, worked into a stylish design. Check out the hidden braking cables for instance. The way we have incorporated them into the design makes the **TRACK>** safer, easier to use and much better looking!

## TRACK>
