| L | 43-46 | 8.5 - 12 | 9.5 - 12.5 | - |

Reflexa®

Leaders in well-being innovation

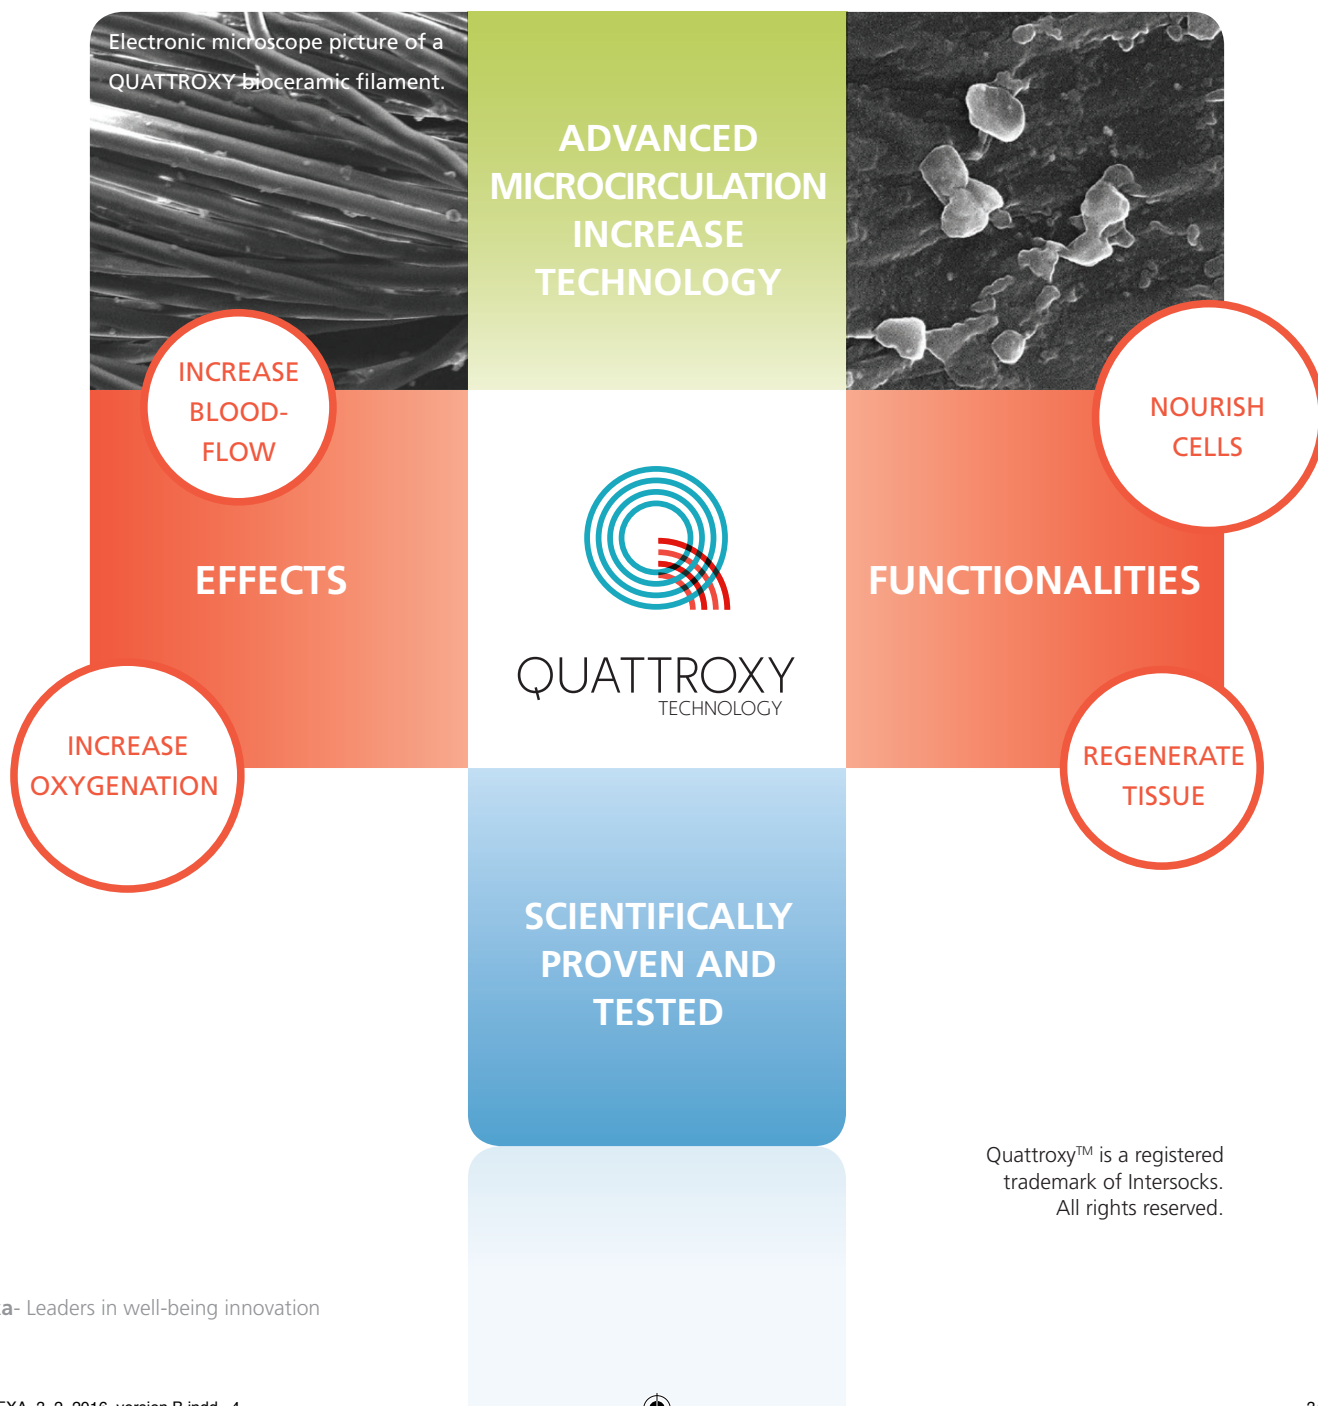

Reflexa® is a leading brand in textile innovation, helping the well-being of people with specific health-related challenges: diabetes, limb amputation, sensitive ankles, feet tiredness, feet discomfort and irritation.

Reflexa® uses the highly-advanced microcirculation increase technology Quattroxy™, the effectiveness of which has been confirmed by studies* and testing. Better and improved blood circulation can help nourish cells and regenerate tissue.

The Reflexa® products are setting new standards in quality by being produced in the most sophisticated textile manufacturing facilities in Italy.

*Financed by the European Union

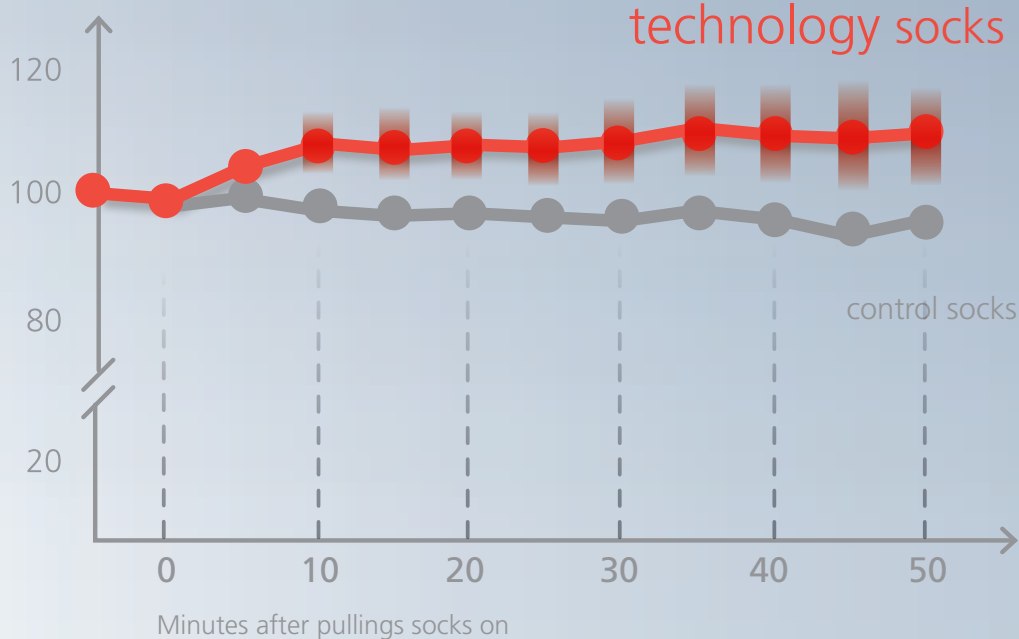

Microcirculation difference in feet measured in patients with diabetes wearing a QUATTROXY™ technology sock and a control sock.

Relative microcirculation in %
(mean \pm SE, N=30)

ægis™ is a revolutionary technology, which guarantees an optimal active freshness and hygiene for textiles. The technology is based on the fixation of a non-migrating permanent coating on the fibres. The microorganisms are being attracted by the coating. Once they come in contact with the **ægis™** coating, the cell membrane of the organism is punctured, as if by a sword. The piercing mechanism deactivates the microorganism, preventing growth and proliferation.

Reflexa® Diabetic

Reflexa® Diabetic socks are developed specifically for people with diabetes and use the advanced Quattroxy™ technology, which can increase blood flow and oxygenation in your feet, resulting in contribution to cell nourishment and tissue regeneration. They also feature flat toe seam to avoid friction and irritation, are non-binding and exceptionally comfortable. They help keep your feet warm and contain the antimicrobial technology Aegis™ to maintain freshness.

Reflexa® Diabetic
can help:

keep feet
warm

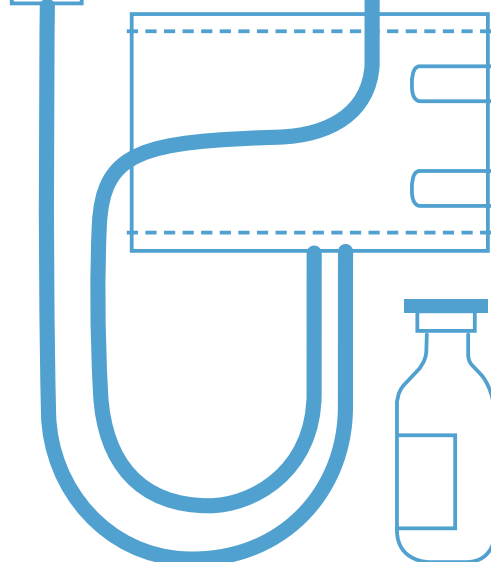

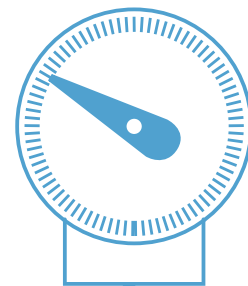

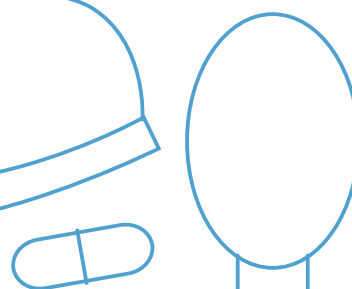

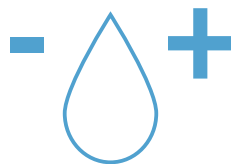

nourish
cells

regenerate
tissue

prevent
irritation
and
discomfort

Recommended for **people with diabetes**

Reflexa® Oxygenated Compression

Reflexa® Oxygenated Compression are developed specifically for people who stand or sit for long periods of time, for everyday wear. The socks feature a unique combination of graduated compression (not too tight and not too loose, the top of the sock with 30% lower compression than the bottom, increasing gradually) and the highly-advanced technology Quattroxy™, which can increase blood flow and oxygenation in your feet. Using them as an all-day everyday sock can improve the well-being of office workers, frequent travellers, and sportsmen such as golfers. Contain antimicrobial technology Aegis™ to maintain freshness.

QUATTROXY

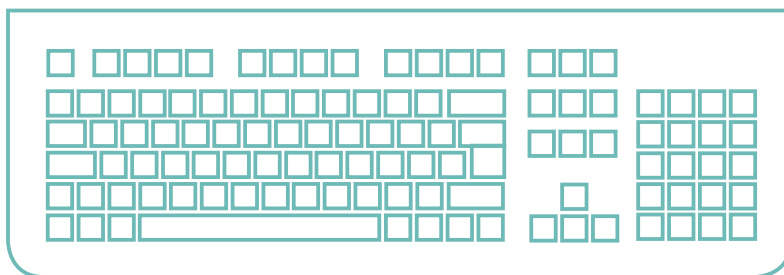

Reflexa® Oxygenated Compression can help:

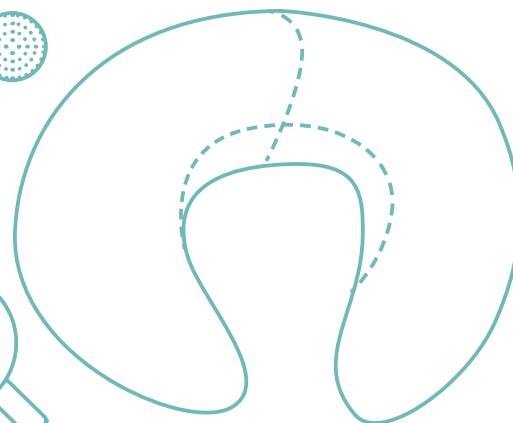

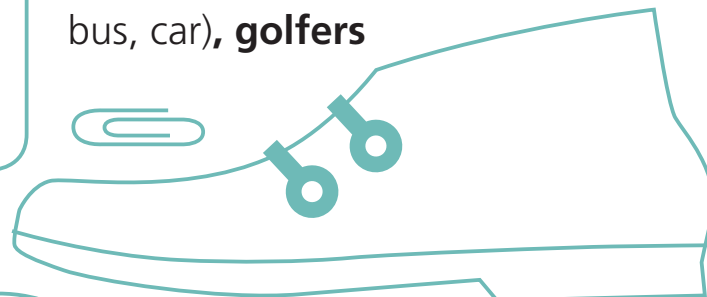

decrease tiredness of feet during extended periods of standing or sitting

increase general well-being when worn as everyday socks

Recommended for **office workers**,
frequent travellers (plane, train,
bus, car), **golfers**

Reflexa® Ankle Support

Reflexa® Ankle Support socks are developed specifically to aid ankles during walking or sports activities. In addition to the unique way of knitting and arch support, they integrate the advanced Quattroxy™ technology, which can increase blood flow and oxygenation in your feet. Flat toe seam is used to avoid friction and irritation. Contain antimicrobial technology Aegis™ to maintain freshness.

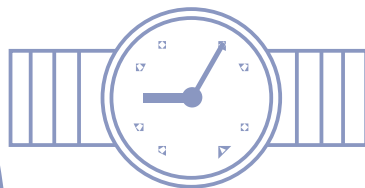

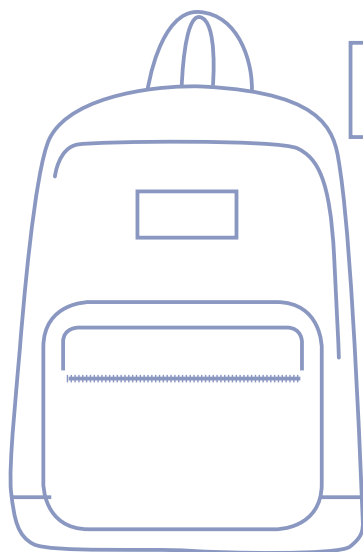

Reflexa® AnkleSupport
can help:

improve
foot
pronation

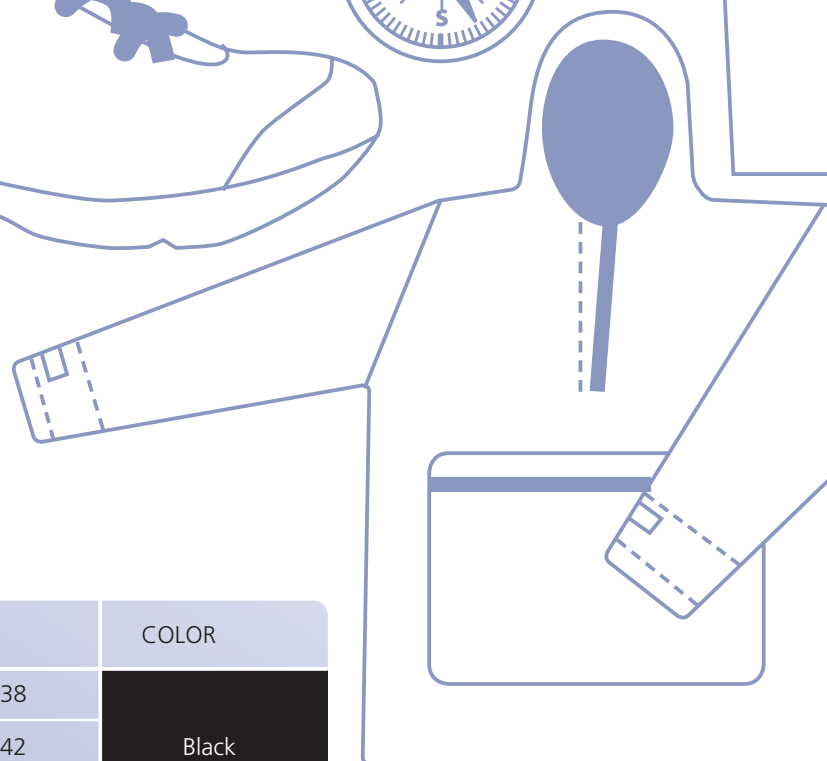

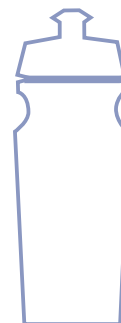

prevent
ankle
sprain

decrease
ankle
swelling

prevent
friction and
irritation

Recommended for **people with sensitive ankles, sportsmen, frequent walkers**
