## Front caps

Front caps for intermediate (e.g. TV) and close distances (e.g. reading).

Basic front cap snaps into place with audible click for firm hold

Optional Add-on front caps can be combined with Basic front caps to provide higher magnification and variable working distances. Add-on front caps flip up easily when not in use

Combined use of Basic and Add-on front cap creates an aplanatic front cap without spherical aberrations

Different working distances ranging from 200 to 4.17 cm can be combined

Calculation of the working distance based on the system's pre-set infinite focal distance by dividing 1 by the D power of the front cap(s). The close distance magnification is the system magnification multiplied with one quarter of the D power of the front cap(s)
