

Chiroform®™ Anatomical Head Pillow De Luxe

Chiroform Pillows consists of pure open-celled visco-elastic foam of min. 80 KGs/Cbm, which allows the material to breathe. The visco-elastic foam responds perfectly to the body temperature and dynamics. Further more the shaped side have been convoluted into an egg box pattern. In other words: the pillow keeps its shape whether you sleep on your back or your side, giving optimal support and pressure relieving effect.

Most people will experience the Chiroform®™ Pillow as a perfect pillow for ideal support and good quality of sleeping. If room temperature is very low, the memory foam of the pillow becomes stiff. This is quite normal for the material, which has been constructed to react sensitively on body heat. It can be avoided at a room temperature above 14-17° C.

A slight scent of new material may occur just after removal of transport packaging, but it should not cause any alarm, as it is harmless and will disappear in the course of a few days.
