We are **CloudCuddle**

CloudCuddle is a Human Protection brand. We offer a solution for safe sleeping. Human Protection develops and supplies medical devices that are used, in combination with healthcare professionals, to provide good care to and ensure the safety of vulnerable people.

Creating a sense of comfort - always and everywhere, for everyone.

Human Protection, which has over 35 years of experience providing solutions to agitation in a care setting, acquired CloudCuddle at the end of 2023. Since then, CloudCuddle has been an official part of our portfolio. We are developing the product further and working to make it available more widely – to families, healthcare providers, and care institutions.

A one-stop shop

We guarantee quality, continuity and fast service, with our own in-house workshop, professional cleaning service, and logistics support. Just what's needed for medical devices that are used in vulnerable settings.

Our mission

Human Protection wants to be the most meaningful company, providing support for the safety of vulnerable people, with the aim of creating a sense of comfort and 'prioritising the least restrictive intervention where possible'.

Our vision

Providing the most humane solution to promote the safety of vulnerable individuals in care, always and everywhere.
