Nursing care

Accessories

With love for detail

When it comes to care for the elderly, a good human interaction between nursing staff and residents is very important. wissner-bosserhoff understood that an open-minded and friendly personal interaction can be supported by helpful and innovative products. When less time is needed for necessary jobs and tasks, more time is left to care for residents. We have developed useful accessories for our products, which contribute to better quality and efficiency in the field of nursing care.

Contents

Lights	4 - 5
Bed exit system	6 - 7
Mobilization	8 - 11
Storage	12 - 13
Protection	14 - 17
Care	18 - 19
Design Softcover	20 - 23

Lights

The undulating shape of the lampshade, with its partially translucent character, is prominent as a special design element of soluna lights. Equipped with a swivel arm, the light allows the light focus to be precisely positioned close to the object to be illuminated, regardless of whether the light is attached to the bed or the bedside cabinet. Either halogen or LED illuminants can be chosen as the light source. Advantage of LEDs: a long life, low energy consumption, no heat generated and absolutely safe operation.

50-0677
LED reading light lymera
(with and without power supply unit)
Transparent lampshade

50-0550
Design reading light soluna
LED, without power supply unit

01-010812, 01-010813
Switchable underbed light
(Night light function)

Advantages of LED

- Long service life
- Low energy consumption
- No heat build-up
- Safe operation

Safety by day and night

SafeSense® – the intelligent bed exit sensor system

wissner-bosserhoff, your reliable partner for the reduction of freedom-depriving measures (FDM): With SafeSense®, wissner-bosserhoff presents an intelligent assistance sensor system, which reliably helps reducing freedom-depriving measures day and night. It is equipped with an automatic night light, which is activated when the resident leaves the bed and is deactivated when the resident is back in bed again. SafeSense® is compatible with standard nurse call systems and can be retrofitted to wissner-bosserhoff nursing home beds manufactured in 2002 or later.

Automatic night light

- Night light is automatically switched on when the resident leaves the bed
- Night light is switched off again as soon as the resident is back in bed

Individual nurse call

- Freely adjustable immediate call from 0 seconds to 30 minutes
- Adaptation to the resident's mobility

Integrated or available as retrofit kit*

- Accessory option for current WIBO nursing home beds
- Retrofit kit for electrical WIBO nursing home beds manufactured in 2002 or later
- Available with cable or wireless

**More safety –
less freedom-depriving
measures (FDM)**

- Fast response time in the event of falls
- Safety during night and weekend shifts
- Fewer inspections
- Ideal in combination with sentida low nursing beds and SafeFree® side guards

SafeSense® bed exit system

SafeSense® Sensor mat 2.1

SafeSense® Retaining plate

01-011193
Retaining plate for DU09 motor

01-011194
Retaining plate for Q7 motor

Mobilizing

Independent mobilization reduces the risk of falling. We would all like to remain independently mobile for as long as possible. This is why it is so important to reserve and promote the individual mobility of care-dependent residents in line with the standard, developed by experts, known as „Preservation and Promotion of Mobility in the Field of Care“. The benefits for resident range from social participation to health promotion.

SafeLift bed operation

10-0811
SafeLift Controller

10-0808

10-0799
SafeLift Mobilisations-Assistent,
Set including box

- Entry and exit aid
- Simple bed operation
- No cable, no battery
- An automatic night light
- Easy installation, retrofitting

The MobiStick 2 enables clever bed operation for residents. Its ergonomic shape makes it easy and intuitive to use anywhere. Residents can effectively support and move themselves.

MobiStick 2

NEW!

Without tools

MobiStick 2 can be attached without tools on both sides of the bed, is suitable for every resident size and can be retrofitted for wissner-bosserhoff beds from 2004 onwards.

Due to its ergonomic shape MobiStick 2 is easy and intuitive to use and universally applicable. The hand knob is rotatable and has a simple locking.

When not in use, it can simply be folded away and is therefore not in the way, but quickly ready for use when needed.

Bed transport trolley for assembled
nursing home beds

sentida 7-i | Design Df | Decor Cottage Pine + fabric cover imitation leather silver grey

Design | Softcover

With our new cover solution made of high-quality materials from renowned partners we offer an excellent surface material with outstanding properties.

Softcover | Synthetic leather

The special feel, special properties and expressive embossing give high-quality upholstery materials their individual character. In addition to unusual designs, surfaces are also distinguished by their ease of care. Imitation leather made of PVC plastic scores above all with durability and thus stands for genuine quality. Further information is available on request.
