

Looky HD

Looky^{HD}

The LookyHD Touch is the latest addition to the universally known and revered Looky range. The original Looky was the first handheld device to incorporate a centrally located camera along with a handle for convenient use. The new LookyHD Touch incorporates a bright, vibrant and intuitive touch screen producing superb crystal clear images and exceptional brightness utilising the touch interface on the 5" screen.

Whilst embracing the future we have been careful not to lose sight of the features that made previous Looky models so successful. With this in mind we have still retained the handle, which now has a dual purpose: the handle also contains the battery. The handle can be easily removed for your convenience when the LookyHD Touch is not in use, and also replaced once the battery eventually depletes. The handle system allows for you to bring along an extra charged handle as back up if you should require it.

The LookyHD Touch is the most advanced yet simple to use portable magnifier on the market and incorporates many other exciting features in one compact and sleek design.

Rehan Electronics takes great care to manufacture our products in a sustainable and environmentally friendly manner. All products are produced and tested in our eco friendly facility based in Co-Wicklow, Ireland. Our facility is designed to be a low carbon construction with emphasis on natural materials, occupant health and energy efficiency.
