

head protection CAPO **VARIO Soft⁺**

... light and comfortable
with the PLUS of flexibility and accessories

head protection CAPO VARIO Soft⁺

... light and comfortable with the PLUS of flexibility and accessories!

The new helmet from our popular CAPOVARIO SOFT series.

The helmet can be adjusted precisely thanks to the Velcro-adjustable padding stripes. The head circumference can also be extended or reduced by 6-8 cm as required.

The CAPOVARIO SOFT+ also offers new equipment variants and additional accessories. For example, the helmet can be equipped with padded straps, an improved chin protector and an upholstery for the buckle. As a new fastening variant, we also offer a push button.

As with the previous model, a velcro-on forehead pad and/or neck pad can be added depending on the indication. This provides particularly good protection.

The model is available in 3 colours (grey, red, blue) and in three sizes (S, M, L). The measurements of the individual sizes can be taken from the table on the order sheet.

New: padded straps selectable

New fastening variant push button

New accessory: upholstery for the buckle
