

Introducing new Roll-A-Ramp, the convenient, affordable portable ramp system that's perfect for a world of uses! Roll-A-Ramp is so simple to use everyone can quickly set it up virtually in minutes.

Light and strong, Roll-A-Ramp is the perfect loading and unloading solution for serious do-it-yourselfers, contractors, homeowners, gardeners, wheelchair users . . . anyone looking for convenience!

Fabricated of strong anodized aerospace aluminum, Roll-A-Ramp holds up to 2,000 pounds of evenly distributed weight!

Used in the stage sound and lighting industry worldwide (seen here in Germany)

Roll-A-Ramp is Strong and Flexible

- Portable — Each lightweight section rolls up quickly. Includes strap-handle for easy transport and storage.
- Adjustable — Standard 12-inch system easily adjusts to different wheelbases.
- Lightweight — 30-inch x 8-foot model weighs 45 lbs. Each standard 12-inch x 8-foot section weighs approximately 26 lbs.
- Strong — Made of revolutionary new high tensile strength 6061 Aircraft Quality anodized aluminum.
- Durable — Designed and built for years of rugged use.
- Safe — Built-in rails ensure safety.
- Smooth on and off — Roll-A-Ramp cambers gently and each end slopes gradually for easy, jar-free access.

Used for delivery vans by many satisfied customers

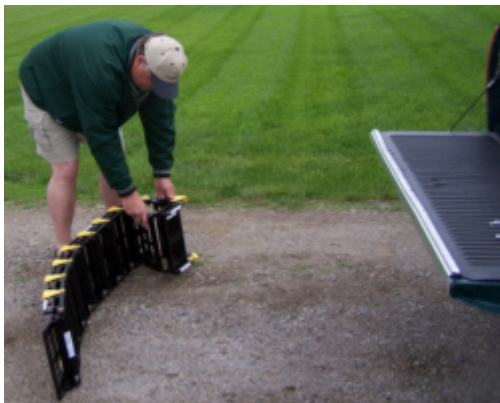

Holds up to one ton!

Fabricated of strong anodized aerospace aluminum, Roll-A-Ramp holds up to 2,000 pounds of evenly distributed weight!
