Intended use:

The Master Turner and the Cover form a turning system that can be used for users where moving around in bed is difficult either due to physical or cognitive deficits. Friction is reduced between the user and the surface, thereby reducing the risk of shear injury for user and optimizing the ergonomic conditions for the caregiver when turning, moving the user up/down in bed or transferring to sitting on the bed side. The Master Turner should always be used in combination with a Mattress Cover from master care A/S to insure the best reduction of friction.

Declaration's validity:

5 years after signing or changes to the technical documentation.
